## A LITTLE GAME-CHANGER

### FEATURES

**Compact Mini-ITX** – A highly compact layout efficiently uses space to keep dimensions minimized.

**Fine Mesh Ventilation** – The entire front panel and part of the top panel features fine mesh, achieving efficient airflow while also filtering out dust.

**200mm RGB Fan** – Even with compact dimensions, the H-Series' iconic 200mm RGB fan is included for optimal cooling.

**ATX Power Supply** – Full-sized ATX power supplies are supported to improve hardware compatibility and ensure efficient power to the system.

**Built-In Handle** – A handle is built into the top panel for added portability and on-the-go gaming.

**RGB Lighting Control** – One RGB controller is included in the accessory pack. If the motherboard does not support the RGB control function, the RESET button can control the RGB lighting directly from the I/O panel.

### MasterCase H100

The MasterCase H100 remains fiercely loyal to the H Series, unwilling to part from the 200mm RGB fan despite its mini-ITX form factor. From its industrial design elements to its generous use of mesh, the H100 fits neatly in the series as a travel-sized variant.

Mesh makes up the entire front panel and part of the top panel, offering just enough room for a built-in handle to add to its portability. Compatibility for an ATX power supply ensures efficient power to the system for on-the-go gaming; ideal for LAN parties and events. Whether you're saving desk space or looking for a portable alternative to the H Series, the H100 houses powerful mini-ITX systems in a tiny amount of space.
