The Art Of Engineering

40 engineers and two years later, we bring you what just might be the last power supply you'll ever buy. Designed, sourced and manufactured in Japan, we achieved and we created a PSU that exceeds Titanium efficiency. Its current is so smooth and stable, its temperatures so low, that we needed new standards to measure them.

Features

Exceeding Titanium efficiency: 95% efficiency at 50% load

Better Transformer: Utilizing a Murata made stacked planar transformer, we have less heat loss and a more efficient energy conversion.

Semi-Passive: Silencio 135mm fan only starts spinning at a load of 600W and is quiet under load

Exclusive design: Our Limited Edition Power supply has Murata designed components that tightly control EMI and Ripple.
